THE ART OF PERSONALIZATION

CHIMERA

It all starts with building your own personal truck. Creating a custom ride that is uniquely yours.

Air Design is proud to introduce the new Street Series Ground Effects Kits, meticulously designed to combine beauty, function and style.

Our racing inspired Ground Effects Kits flowing lines and integrated Aerodynamics add a new dimension in elegance, modernity and glamour.

Air Design Complete Body Systems are emotionally charged with the truck's unique DNA, adding a new level of Personalization and Performance.

Air Design's Street Series Front Spoiler, Hood Scoop, Side Rocker Panels, Tailgate Applique, Tailgate Spoiler and Rear Skirt are inspired in the classic lowered Pick-Up Trucks, improving aerodynamics by redirecting the air away from the back and underbody.

With a strong commitment towards Innovation and the use of State of the Art Technology, our product development process integrates a sophisticated digital workflow.

Starting with the laser scan of each vehicle, our R&D Team literally invests thousands of hours in concept design and engineering utilizing powerful 3D Modeling software to breath life into each component we put into the market.

Air Design Complete Body Systems are manufactured with high performance Reaction Injection Molding Polyurethanes by American Huntsman and Austrian ABS Thermoplastics, for great Flexibility and Strength, superb Surface Quality, precise Fit to the Body and long lasting Durability. Air Design Complete Body Systems comes factory coated with German Automotive Satin Black OEM approved paint.

Now It is the time to Build Build Your Own Ride.

MAKE IT YOUR OWN

COMPLETE BODY SYSTEMS

Air Design's award winning COMPLETE BODY SYSTEMS for pick-up trucks are custom designed, precision engineered and built to meet an unparalleled level of refinement and innovation.

All parts are carefully developed and produced In-house using state-of-the-art equipment and the very best OEM automotive engineering plastics.

No matter what model of American truck you drive, with Air Design's SUPER R.I.M. range of Complete Body Systems you will add distinction and a refined sporty style.

Air Design's accessories have a 3-year warranty.

17 PIECES

OF POWERFUL TECHNOLOGY

All our aerodynamic parts add character to your truck's unique DNA with greater performance for almost unlimited possibilities to fulfill your personal style.

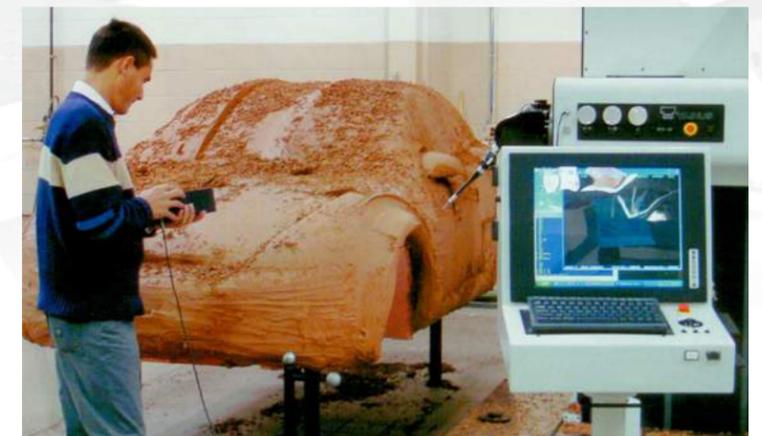

FINISHING TOUCH

“GREAT THINGS ARE DONE WHEN PEOPLE, INSPIRATION AND TECHNOLOGY MEET”

Carlos Avalos

It all starts with building your own personal truck, creating a custom ride that is uniquely yours

COMPLETE BODY SYSTEM

PERSONALIZE YOUR EXTERIOR AND PROTECT YOUR INTERIOR

Every custom Truck Complete Body System and Floor Liner by Air Design has been meticulously designed to combine beauty, function, durability and style

TIRED OF FLARES VIBRATING?

Air Design's SUPER R.I.M. Fender Flares incorporate our proprietary SUPER-BOLT (PAT.PEND.) fixing system that adheres to the vehicle's surface, for a no-drill, mechanically robust fixation, and a very precise fit.

It's time to reveal our secret...

A NEW STANDARD IN FENDER FLARES

WHAT MAKES AIR DESIGN'S FENDER FLARES SUPERIOR?

First: Studied curves and elevated details in every Fender Flare by Air Design are artfully crafted in accordance to the vehicle's original DNA. All pick-up trucks are different from each other, so before we design a new part we first pay attention to the heritage and identity of every new truck that comes to our studio.

Second: Patented Super-Bolt Technology: The only Fender Flares that features a mechanical fixation to the body line to eliminate all vibration and paint damage.

Third: They feature a mud flap anti-splash contour that widens the bottom of the flare, protecting the sides of the vehicle! This advanced aerodynamic mud flap integrated into our Fender Flares stops rocks and road debris from chipping your vehicle's paint.

Fourth: The parts are molded using high-tech multilayer Black ABS Senosan polymer from Austria, and are top coated on their surface for extra UV protection and strength using a German OEM approved 2K Satin Black Paint.

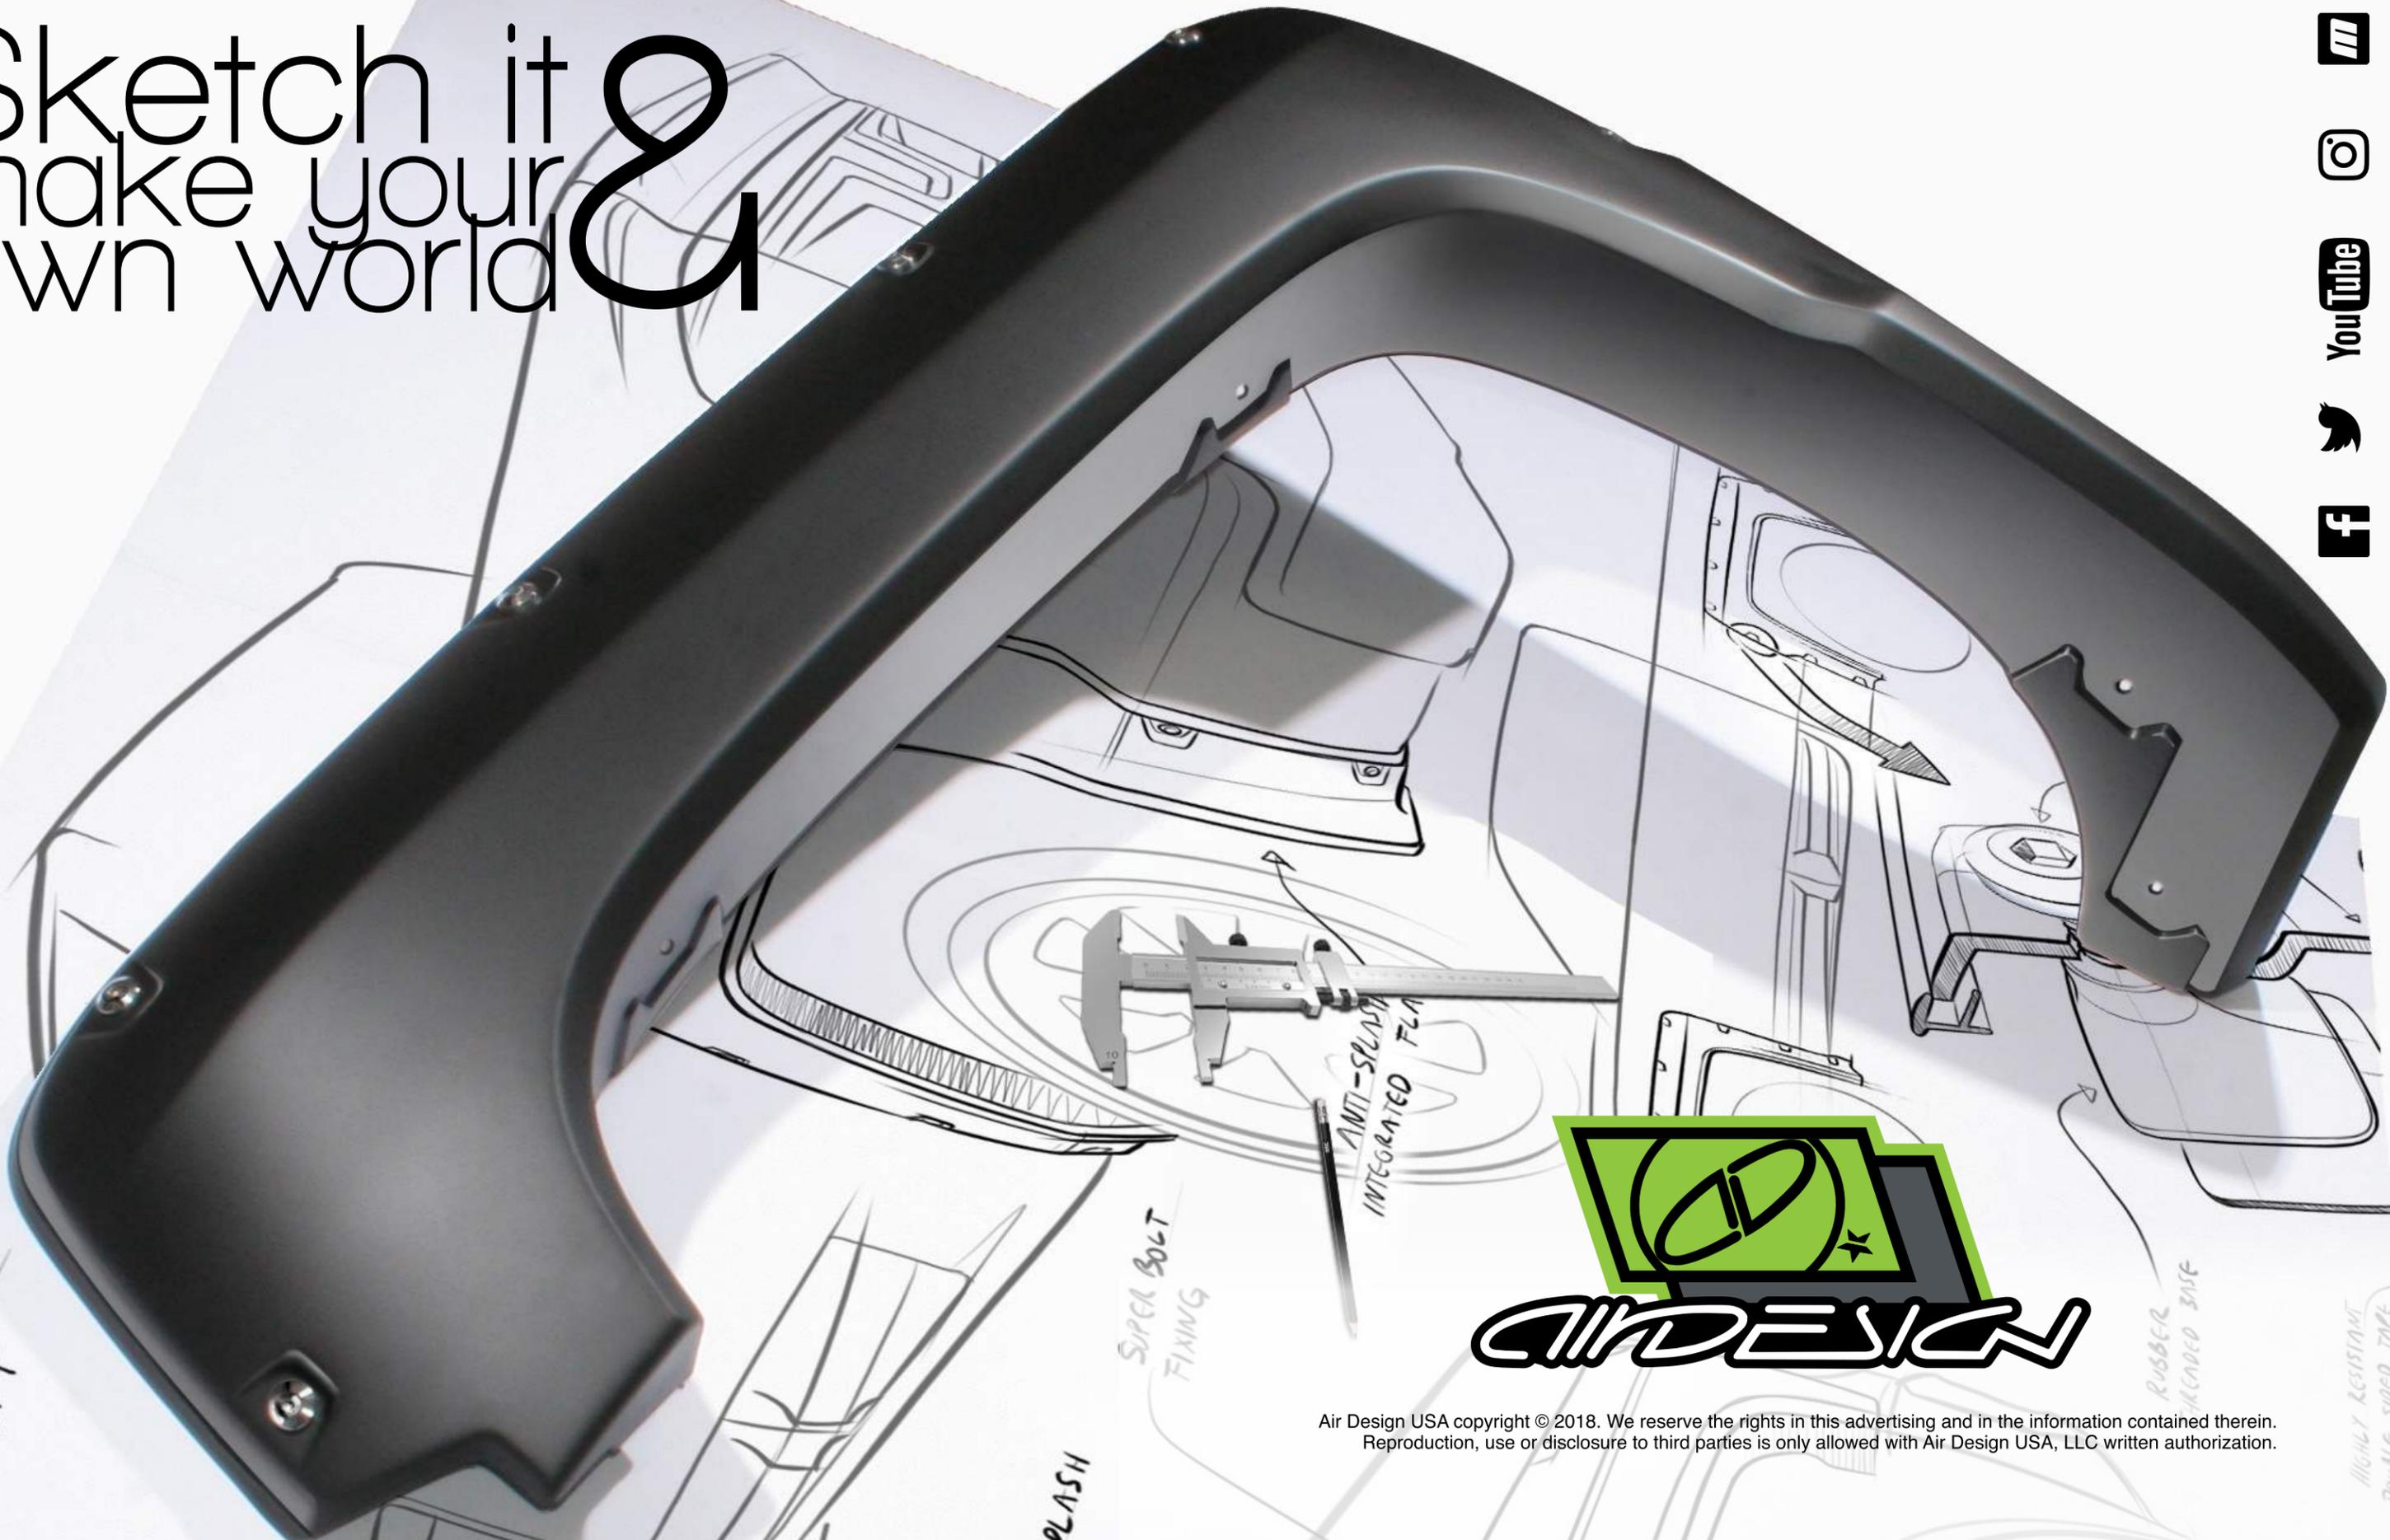

ADVANCED AUTOMOTIVE DESIGN

Air Design's Complete Body Systems and Interior Protection are based on our Overmolding® proprietary technology which incorporates high impact multilayer Senoplast™ Polymers, and high pressure Injection Molding Polyurethanes.

This creates long-lasting, super-attractive products with best-in-class fit and finish. Every Air Design accessory is ready to install and comes finished with German OE Satin Black paint for extra UV protection and a premium finish.

**EMBRACING YOUR
INDIVIDUALITY**

Every piece of Sport Fender Vents by Air Design is custom designed to make your pick-up truck stand out with chiseled looks reminiscent of those found in trophy trucks. It's all about style, versatility and endurance to bring your story to the road, no matter where it takes you.

FENDER VENTS

THE MAGS PERFECT

Our custom-designed sport-type Front Bumper Guards deliver the heart of off-road. These pieces of art are manufactured with the most advanced OE materials for a stunning premium front end upgrade! Air Design's heavy-duty, high-impact Front Bumper Guards fit like a glove on your front bumper in a matter of minutes without having to drill or cut any section of the vehicle.

PUR R.I.M.

POLYURETHANE REACTION INJECTION MOLDING

FRONT BUMPER GUARDS

Manufactured only with the best high performance Huntsman™ Polyurethane polymers and a surface perfectly coated with German automotive Satin Black OEM paint. Installation uses all factory attachments, without having to drill or cut any section of the vehicle.

LIGHT IT ON

Each Front Bumper Guard includes DOT approved Osram Sylvania DRL LED Technology Lights attached to the Bumper Guard for an upgraded Day Time Running Light visibility. 24/7 All time on.

THE STREET KING

TAKE YOUR INSPIRATION FROM EVERYTHING THAT SURROUNDS YOU.

You have driven that road many times before, but then you come back to this perfect old building to which you have always been fascinated and where you find peace.

It's funny how you can drive a road many times and never really notice all the great things around, until you feel complete.

RED EPIC BEAST

With the inside looking as great as the exterior, our SUPER R.I.M.® Ram Pick-Up Truck hits the road again equipped with all the amenities money can buy.

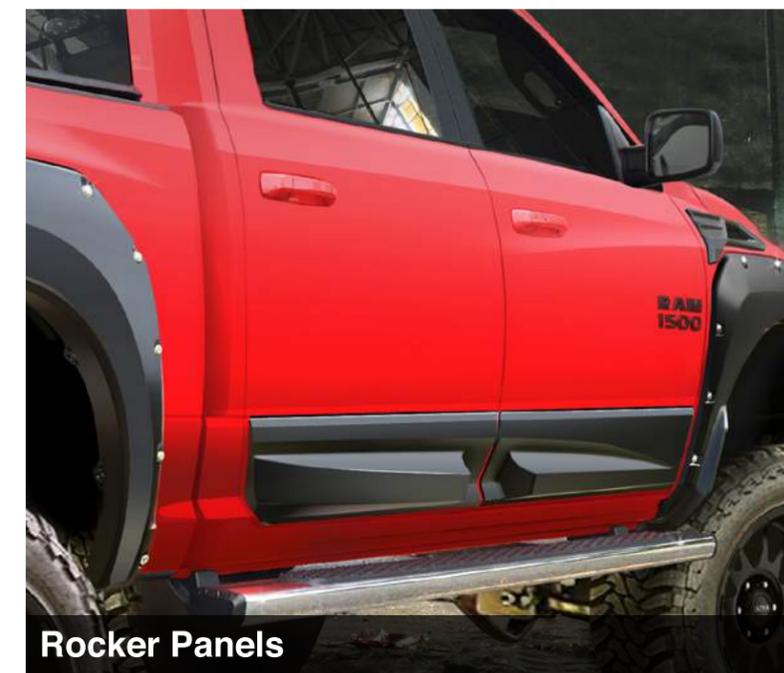

Style, function and durability that sets you apart from the crowd.

OUR DESIGN CENTER & MANUFACTURING PLANT

For more than 26 years, Air Design has collaborated with different partners in the automotive industry to design, develop, produce and deliver a wide range of accessory solutions molded in thermosets and thermoplastics, aluminum and steel, for exterior and interior applications in passenger vehicles.

By fostering a culture of Innovation and emphasizing the extensive use of the latest technology and composite materials, Air Design is positioned as a clear leader in the automotive supplier partner area. We consistently deliver impressive Industrial Design and Custom Manufacturing Methods to support the most demanding vehicle personalization programs within the OEM segments.

Air Design is a true full-service development partner, offering a broad range of collaboration capabilities, including: Conceptual Sketches, Renderings, Design, 3D Modeling, CAD Engineering, Rapid Prototyping, Tooling, Manufacturing, Delivery, Installation Training, and ongoing Support.

Air Design employs approximately 250 engineers, designers, and plant personnel from over 15 different countries that collaborate at our plant in Cuernavaca, México City and at Air Design USA in Oceanside, CA.

SILVERADO CUSTOM ROD BY AIR DESIGN

CUSTOM ROD

SEMA
SHOW
2017

Meet Anel, Industrial Designer and her Silverado Custom Rod featuring the all new Air Design Street Series Ground Effects Kit.

She's 31, she lives in Cuernavaca and Mexico City, working for Air Design as Art Director. Some of her time is also spent at Air Design USA Headquarters in Oceanside, Ca.

Growing up around Hot Rods, a Car Drifter herself, an avid SEMA Show and Viva Las Vegas Car Show visitor, it was inevitable that she would be appointed for the Design and Preparation of one of several vehicles to be presented by Air Design at SEMA 2017.

The project began mid this year with a 2017 brand new Regular Cab Silverado 1500 V8 5.3 Liter engine. After carefully selecting all major mechanical elements for the project and working in parallel with the red classic leather interior trim, it was time to straighten out the truck's body for a distinctive Sherwin Williams Ultra 7000 two toned mate Paint Finish, combined with a Custom Hand Pin Stripping work done by herself.

Meet Air Design's new Street Series Ground Effects meticulously designed to combine Beauty, Function, Durability and Style: The Flowing Lines and Integrated Aerodynamics of the racing-inspired Silverado Ground Effects Kit add character to the Pick Up's DNA with Personalized Performance.

The Silverado Street Series Front Spoiler, Side Rocker Panels and Rear Skirt are inspired in the classic lowered trucks, while improving aerodynamics by redirecting the air toward the ground and away from the truck's underbody. The Silverado "Plug and Play" Styling Kit is manufactured only with the best high performance Huntsman Elastomeric Polyurethane polymers for great Flexibility and Strength, superb Surface Quality, Perfect Fit to the body and Long-Lasting Durability.

The Silverado Ground Effects Kit comes factory coated with German automotive Satin Black OEM approved paint.

Special thanks to Chevrolet Unicars, Sherwin Williams Automotive Finishes, Borla Exhaust, VestiAuto, Keystone, Asanti Wheels and Toyo Tyres.
